

iimmersion

Immersion is a non-partisan professional and leadership development program whose goal is to provide attendees with in-depth knowledge about each segment of Southern Arizona's construction, real estate and development sectors. Professional development, industry focused education and civic engagement are a few of the benefits participants will receive from this three-month program.

Each session is led by industry experts and community leaders from both the public and private sector, providing participants beneficial connections in addition to knowledge. Immersion hosts cohort(s) in which participants expand their knowledge of development in our region and become strong industry and community leaders. MPA's Immersion program is created exclusively for early to mid-career professionals and future industry leaders. It is a great opportunity to learn every segment of the business and network with peers and leaders in our industry.

The 2023 program will begin in October and continue through December of this year. There will be 5 course days total, with one being an on-site tour of an active project. Each course day will be comprised of two topic sessions with each topic lasting two hours, resulting in a total of 10 topics covered throughout the duration of the program. Included in each course day is lunch and a hosted happy hour, allowing participants to engage in relationship building with their classmates and that day's topic presenters, hosts and moderators.

Program Dates: October 20th, November 3rd & 17th December 1st & 15th

Program Investment

Private Industry MPA Member: \$850
Private Industry MPA Non-member: \$1,000
Public Employee or Community Partner: \$500

MPA is a non-profit 501c6, non-partisan membership organization dedicated to providing advocacy, education and relationship building for the land use and development community of the greater Tucson region. Unique to the region, MPA is an alliance of business, government and non-profit organizations. MPA's goals relate to improving our region's quality of life and economic vitality. Land development is the foundation of economic development and our role in the community is to advocate for balanced residential and commercial land use policies that stimulate economic development and reasonably preserves our natural environment.
